

Aviation Safety Seminar and Fly-In

Saturday 16 May, 08:45 am, CWC Airport

A Pilot's Scavenger Hunt!

During this spring's Safety Seminar / Fly-In, we will focus on one of navigation's basic principles – pilotage. Pilotage is defined as "Navigation by visual reference to landmarks." The seminar event will focus on one of the leading accident causes, loss of control (LOC). We will review some critical areas for LOC during normal operation, and also review the PTS standards for performance take offs and landings, which might come in handy for your next Wings training flight.

Bring all your gadgets (tablets, phones, GPS, sectional, laptops) you normally use when flying your airplane. You will be provided an envelope containing clues about the turn points of your route before take-off. At each turn point, you will be asked to complete a specific task.

In the interest of safety, you are encouraged to share this experience in the cockpit with another pilot or your favorite Navigator/Safety Observer.

By staying sharp on navigational and positional awareness, many automation pitfalls of Technical Advanced Aircraft (TAA) can be avoided. Don't land at the wrong airport or be caught by surprise when the glass or GPS malfunctions. Stay ahead of the game!

No airplane? No sweat -- navigate, ride along, watch airplanes take off and land during the event, or just enjoy the Seminar Program. There will be plenty of fun for all!

About the Event:

The event is sponsored by your Wichita Falls FAASite. You will receive "WINGS" credit for attending the flying and seminar event. In addition, we will have information areas set up where you can learn more about Angel Flight, Civil Air Patrol (CAP) and Cobra Kai Flight Academy. At our "WINGS" booth, one of our FAASite members will help you navigate online through the WINGS program and even create and print your WINGS checklist (flight training and online courses) by selecting topics you are interested in.

Timeline:

- 0845 - Sign-up, Coffee and Doughnuts
- 0915 - FAA WINGS Presentation. You will receive WINGS credit
- 1000 - Weather & NOTAM briefing and handing out of tasks for the Scavenger Hunt
- 1045 - First take-off
- 1200 - Recovery of airplanes, revealing of routes and tasks.
- 1300 - Lunch and Awards ceremony

For sign-up, updates and more information see <http://check6.wikispaces.com/Scavenger+Hunt>, send email to hans-peter.schuele@att.net, or call 940.636.2283.
